Aesthetic and Reconstructive Surgical Skills
Cadaver Dissection
12-16 July 2010
(The School of Veterinary Science, University of Bristol)

This course aims to provide plastic and other surgical trainees with the knowledge of clinical anatomy relevant to a range of surgical techniques. This will enhance their understanding of the procedures when they subsequently perform them in a clinical setting.

This course is sponsored by BAPRAS (British Association of Plastic Reconstructive and Aesthetic Surgeons).

Course Director

Mr Ciaran Healy
Consultant Plastic Surgeon
St Thomas’ Hospital, London

The course is split into five one-day modules:
- Breast and Torso
- Head and Neck and Facial Aesthetics I
- Head and Neck and Facial Aesthetics II
- Upper limb and Hand
- Lower Limb and Foot

Course Style
- The trainees will carry out the operations on the cadavers using the appropriate surgical instruments and devices, under the supervision of an experienced surgical tutor
- Fresh frozen cadaver dissection
- Faculty to delegate ratio of 1:2, with one cadaver per delegate
- The course is accompanied by a dedicated website containing an overview of the relevant anatomy and surgical technique

Fee: £650 per module
Discounted fee of £3000 for all 5 modules
