Asthma Update
Half-day practical workshop

Support your patients, improve your knowledge
This workshop is designed for health professionals who manage people with asthma – a condition that currently affects around 5.4 million people in the UK and who want to update their knowledge and skills in this area.

Led by expert practising clinicians, the workshop focuses on the latest evidence for supporting patients in controlling their asthma and avoiding exacerbation, including the new NRAD recommendations. You will gain an overview of the latest guidelines and new treatment options, including new inhaler devices.

This is an interactive workshop, involving presentations and group discussions, held in an informal and supportive atmosphere.

You will learn to . . .
• Apply the latest BTS/SIGN guidelines
• Understand the latest recommendations on asthma diagnosis
• Implement the latest treatment options
• Assess severity and manage acute asthma
• Identify the advantages and differences between new inhaler devices
