Clinical Academic Mentorship Scheme

The Cardiff MRC Centre for Neuropsychiatric Genetics and Genomics is very pleased to launch an exciting new scheme for clinical trainees planning an academic career in psychiatry or neurology.

The scheme is open to individuals at all stages of postgraduate training but is particularly focused on those early in their career. Applications from anywhere in the UK are welcome and not restricted to those currently in academic posts such as ACF’s.

Those appointed to the scheme will remain in their existing posts but will be provided mentorship and flexible financial support that will enable applications to be developed for externally funded research training fellowships to be hosted at the MRC Centre in Cardiff. The scheme will provide support for one year in the first instance, renewable for a second year.

Research activity in the Centre focuses on a number of disease areas employing a variety of research paradigms - including molecular genetics, neuroimaging, epidemiology and animal models.

Applications by CV (max 4 pages) and covering letter outlining why you would like to be appointed to the scheme to be emailed to the address below.

Closing Date: March 12th 2010

Interviews will be on the 29th March

Further details and downloadable leaflet are available at:
