Wessex School of Quality Improvement Evening Event

Speaker: Claire Sokell Thompson
Title: What Role do the Senses and the Mind Have in Healthcare?

This session will use workshop style learning to explore your thoughts and ideas on an area of quality improvement.

This event will also give you the opportunity to network with colleagues across the region.

Claire Sokell Thompson, founder of Vetyver

Her sensory agency Vetyver was commissioned to research the impact of the senses in healthcare, the role of contemplation for patients and audit the sensory impact within Guy’s and St Thomas’ hospitals as part of the development of their new dedicated Cancer Care building.

Claire will provide an introduction to her interesting work with Guy’s and St Thomas’ Hospital using the sensory environment, including transferable learning applicable to all improvement work.

The Wessex School of Quality Improvement (QI) is designed to bring together, make visible and co-ordinate the current range of initiatives within all portfolios of HEE Wessex, as well as create new opportunities which build on these successful initiatives.

12 April 2016
18:00 – 20:00
(Refreshments from 17:45)

Southern House, Otterbourne, Winchester, SO21 2RU
