Dear Colleagues

Please find attached 2 web pages that relate to the recent PMETB Survey undertaken of our Trainee’s. There are 2 overall satisfaction scores for the GP placements. The feedback for the GPSI part of the programme was excellent where we are ranked 5th for overall satisfaction, (this is the highest placed English Deanery!!).

The 2nd web page links to the overall programme satisfaction for the hospital component of the training programme, where we are ranked 8th out of the 20 Deaneries surveyed.

Can I say very well done to all GP Educational Teams and Trainers in these difficult times, for achieving these excellent scores. It really goes to show that the strength of the Wessex Deanery lies with the commitment of its Educators on the ground, their hard work and dedication.

I would personally like to thank all GP Educators and Trainers for this excellent result and hope that we can manage to maintain our standards over the coming year.

You can achieve more detailed feedback by clicking on the “select report” button in the grey box on the left hand side and then select the NHS Education South Central Wessex Deanery in the appropriate drop down menu box followed by General Practice in the next box, which then leads to the large page of several Indicator Scores. For each bar chart, there is a heading to the left “GP Acute Setting” and “GP Practice”. If the mouse hovers over these, this allows a further level of detail to be looked at for each individual bit of information.

If you therefore look at “Clinical Supervision”, you will see that our overall score for this was good (90.56 in GP setting) and well within the mean. Clicking on the “Wessex” yellow button will take you into the detailed information on that report. This report can be explored in depth by following the various items.

Finally, let me say thank you to all who have contributed to training in Wessex and support of the Deanery.

All the best and please pass this on to your Educational Teams and Trainers.

Yours sincerely

Dr Richard Weaver
Head of School of General Practice
