Dear trainee

PMETB Trainee Survey – to be launched April 2010

PMETB will be launching their annual Trainee Survey in the first week of April 2010. The survey will be open until approximately the end of May. All doctors who are in a training post on 31 March 2010 will be emailed this survey by PMETB to complete.

Wessex Deanery had their highest response rate last year, over 91%, and had the third highest response rate nationally. We would like to build on this success this year. All survey results are anonymous but the Quality team here in Wessex do review each and every conclusion, and information from last year’s survey has been used to directly influence the survey questions this year.

The survey data forms an important part of the overall quality information for each post and in turn the quality of your training and we thank you for taking the time to complete it. The Quality team here at the Deanery log all issues (red triangles) and follow each one through to resolution in liaison with each Head of School and Trust Educational Lead. The results are used to directly inform the quality management processes here at the Deanery. In addition, examples highlighting good practice are promoted to share best practice.

The survey should take approximately 20 minutes to complete. Within Wessex we view your survey response as a professional requirement of your training which needs to be completed as part of your training contract. Please retain any certification or reference numbers issued by PMETB at the point of survey completion and include these in your portfolio to be produced at your RITA or ARCP.

The survey results will be available to view on PMETB’s website from August 2010.

Once again thank you for your involvement in this important process

Yours sincerely

Dr Vicky Osgood
Postgraduate Dean
Wessex Deanery

Dr Mark Rickenbach
Associate Dean - Educational Quality and Research
Wessex Deanery
