Wessex ACCS Regional training days – a provisional programme

2014-2015

EMAIL: lee.gray@poole.nhs.uk

Background

Regional ACCS training days (RTDs) provide several advantages to trainees including an ability to regularly meet peers with similar interests and challenges and to be able to provide formal teaching of the whole ACCS curriculum.

Content

The teaching provided shall attempt to cover all of the 25 common competences, the Major and Acute presentations and those practical procedures that are less likely to be done in clinical practice.

Structure

There will be 10 such days per year approximately monthly. In August there will be an additional day for the annual Deanery and speciality induction day for the newly appointed CT1s. There will be no planned day in February due to changeover and the demands of Trust speciality induction.

Each day will be for 6 hours, starting at 10am and finishing at 4pm to allow time for travel. The days will rotate through the Deanery and the 3 Trusts with ACCS trainees namely Poole, Portsmouth and Southampton.

2 days each year will be held at the Deanery and will be largely trainee delivered. Trainees will be encouraged to present cases, patient safety projects, audit or research and a prize will be given to the best presentation.

A Lead for each Trust will be responsible for organising the venue, parking, catering and speakers for the day and dates will be provided well in advance. The Lead simply needs to arrange the day even if the topics to be discussed are not relevant to their speciality.

Topics can be delivered in any teaching style at the discretion of the speaker but should be as interactive as possible. Trainees should be encouraged to present provided an “expert” in the topic is facilitating the presentation.

Speakers should be chosen by the person organising the day and they should be asked to cover as closely as possible the ACCS curriculum and the relevant page given to them to try and ensure the talk is relevant to ACCS trainees.
Dates

These will need to be agreed well in advance and arranged by the ACCS TPD. The programme below specifies the month in which the day should occur but the designated person chooses the actual date.

RTD 10 (UHS) - 18 July 2014, Dr Kathleen Nolan

1000 Health promotion and Public Health (? Public Health Consultant –page 55)
1100 ?example by Brief Intervention Teams for alcohol use
