Guidance on presentation/ case study

This guidance is set out in a way that matches the lecture/seminar option in your learning log on the eportfolio. You are expected to do at least two such entries in each year of your training.

What was the subject and aims of the lecture/ seminar?

Describe briefly the clinical case or the topic of your presentation. State the specific question that you were hoping to answer.

What did you learn?

Describe what you learnt from doing the presentation or case study. In a case study this learning may be what you learnt about the patient, their condition, and your role as a GP Trainee in their care. For a presentation your learning may relate to the topic in question and to the process of preparing the presentation: what were your main messages, how did you get them across?

What will you do differently in future?

Describe this in terms of knowledge, skills and feelings: include suggestions for personal change as well as possible system changes.

What further learning needs did you identify?

Describe needs for learning and development that come out of the audit. These should be described in terms of knowledge, skills and feelings. The needs should be SMART (i.e. specific, measurable, achievable, realistic, timely). What you write in this section and the next should be transferable to your PDP.

How will you address these?

The plans should be realistic and fit into your schedule; your response here should be clear, not vague.
