| The type of work to expect and learning opportunities | All F1 Doctors in Medicine cover their specific team’s patients across a number of medical wards during the ‘normal’ working day. They are expected to deliver the daily medical care of these patients irrespective of specialty. The F1 Doctor is not ward-based. Each team comprises a Consultant, Registrar and an F1. There are no other middle grades in teams, apart from a floating EAU F2 who helps out when the team is on-call on weekdays.  
There is no EAU attachment for F1s. The F1 Doctor is involved with the generic clerking of patients being admitted on their specific team’s day on-take, and keeps these patients for the entirety of their stay in hospital irrespective of medical specialty.  
The seven week cycle in the rota is spit into three: four weeks on ward, one week on nights, and two weeks on holiday. Any leftover patients at the end of the four week ‘on ward’ cycle are inherited by the team coming onto their ‘on-ward’ period (usually around 10 patients).  
The overall educational objectives of the F1 year are to provide the trainee with the knowledge, skills and attitudes to be able to:  
- Take a history and examine a patient  
- Identify and synthesise problems  
- Prescribe safely  
- Keep an accurate and relevant medical record  
- Manage time and clinical priorities effectively  
- Communicate effectively with patients, relatives and colleagues  
- Use evidence, guidelines and audit to benefit patient care  
- Act in a professional manner at all times  
- Cope with ethical and legal issues which occur during the management of patients with |
