Portsmouth Hospitals NHS Trust  
Individual Placement (Job) Description

<table>
<thead>
<tr>
<th>Placement</th>
<th>F2 - MOPRS</th>
</tr>
</thead>
<tbody>
<tr>
<td>The department</td>
<td>MOPRS (Medicine for Older People, Rehabilitation &amp; Stroke).</td>
</tr>
<tr>
<td>The type of work to expect and learning opportunities</td>
<td>The team consists of the FY2, a registrar and a consultant. The FY2 is the only member of the team permanently based on the ward. The patients on D1 are mainly transferred from D3, the hip fracture ward. Other patients come from around the hospital and include patients who should be medically stable but have rehab potential and require on-going physiotherapy. The work involves conducting ward rounds, independent ward work, assessing falls patients and dealing with acute medical issues as they arise. The consultant ward round is an opportunity for teaching and addressing any concerns about the patients. You will see a broad range of medical issues-both chronic and acute.</td>
</tr>
<tr>
<td>Where the placement is based</td>
<td>D1 Ward, QAH</td>
</tr>
<tr>
<td>Clinical Supervisor(s) for the placement</td>
<td>To be notified at start of placement</td>

On call requirements: as per MOPRS rotas covering the MOPRS wards at weekends and on twilights. |
| Employer information | The Queen Alexandra Hospital site has gone through a major |
redevelopment to create a modern and 'fit for purpose' hospital, which was completed in 2009. The majority of the Trust's acute services are now provided at Queen Alexandra following the opening phase of the new state-of-the-art facilities. We provide a full range of acute secondary services to a population of over half a million people. Additional specialist services are provided to a wider catchment area extending as far as Dorset and Sussex.

The 'Emergency Department' at Queen Alexandra Hospital is one of the busiest in the UK treating in excess of 100,000 patients each year.

The 'Medical Assessment Unit' (MAU) and 'Surgical Assessment Unit' (SAU) provide rapid diagnostic assessment for patients admitted as emergencies. These can then be directed to the clinical areas most appropriate for their condition.

The Trust is also home to the Wessex Renal and Transplant Unit and it holds prestigious Cancer Beacon Status for the Head and Neck Cancer Services.

Hosting the largest Ministry of Defence Hospital Unit (MDHU) in the country, the Trust enjoys strong military connections and is proud of this association. This means that as a Trust, we have wider responsibilities than those of standard NHS organisations. Military staff now account for 3% of the total workforce and the Trust has responsibility to ensure the staff have exposure to the appropriate clinical experience required during their times of deployment throughout the world.

It is important to note that this description is a typical example of your placement and may be subject to change.
