the logical framework approach to project governance

main goals: reduce by 2/3 under 5 mortality; and 5-12 mortality; reduce 3/4 maternal mortality

purpose/outcome

component objectives

outputs
*example 70 vaccinated

tasks/work programme

if - inputs then

Assumptions

* only if assumptions are met can the next level of objectives be achieved

risk assess assumptions

Assumptions

* vaccines provided by xx agency

sample indicators means of verification

medical equipment in place

clean drinking water for patients

staff recruited

training programmes

note * from example sheet 2
